engine

***** 1987 Mark VII's are known to have three different engines as a mid-year change was in the works. In anticipation of the Mark VII's greatest production year, Lincoln planned and installed a 225 hp version of the 302 in very few 1987's. The new engine featured larger heads for greater compression, larger openings in the intake manifold, and larger exhaust ports into the already smooth flowing tubular exhaust manifolds of the LSC. The number of 225 hp engines installed by Lincoln into the 1987's is unknown. A 225 hp 1987 Lincoln Mark VII is considered rare. *****
